## SURGICAL Transformation

### Setback Otoplasty

#### Dramatic Transformation

My handsome patient came to me self-conscious about his prominent ears. I performed a bilateral setback otoplasty with a conchal reduction, which reduced the size of the 'bowl' of the ears, tightened the underdeveloped anti helical folds and resulted in ears that sit closer to his head. Scars are hidden behind his ears. 🧡

He is thrilled with these natural results with no visible signs of surgery! 🎯
