

This September, we're celebrating new beginnings, meaningful results, and the people who make everything we do possible.

We're welcoming Hydrinity to our practice with a special launch celebration featuring personalized skincare consultations, exclusive offers, and an opportunity to discover the science behind this regenerative skincare line. We're also taking you behind the scenes of a beautiful comprehensive facial rejuvenation transformation, showcasing Dr. Capek's approach to restoring balance, structure, and youthful softness while maintaining her patient's unique features.

We're celebrating another exciting milestone with our nomination for The Daily Gazette's Best of the Best Awards in three categories, and we're introducing our Fall Full Face Refresh Skincare Bundle, created to address the face, eyes, neck, and décolleté while supporting both prevention and correction.

From new skincare discoveries to transformative results and community support, there's plenty to celebrate this month. 🍁

LUCIE CAPEK MD
PLASTIC SURGERY & MEDSPA

As a plastic surgeon, I approach facial rejuvenation in three dimensions. This before and after series shows multiple views of my comprehensive facial and neck rejuvenation, designed to bring balance, softness, and structural support back to the face while restoring my beautiful patient's unique beauty. 🌸

I performed a subtle endobrow lift, a facelift and neck lift to redefine her midface, jawline and neck contour, and micro and nano fat grafting to restore lost volume. I also performed an earlobe reduction, which is often an overlooked detail that can subtly age the overall facial appearance. Deep laser resurfacing with Contour TRL™ around the mouth helped improve skin quality and to reduce fine lines.

The goal was not to alter the character of her face, but to bring out the youthfulness she feels on the inside. She looks like a refreshed version of herself!
